

TANUSHREE SHAHAPURMATH

MCA 2026 | Fresher – Software Engineer

Dharwad, Karnataka | +91-7483772674 | tanushahapurmamath@gmail.com | [linkedin.com/in/Tanushree-shahapurmamath](https://www.linkedin.com/in/Tanushree-shahapurmamath)

CAREER OBJECTIVE

A passionate and driven MCA 2026 candidate with a strong foundation in Java, Python, JavaScript, Object-Oriented Programming, SQL, Data Structures, and SDLC concepts. Applied these skills across multiple end-to-end academic projects and two industry internships, including ongoing full stack and IoT software development. Eager to contribute as a fresher Software Engineer, bringing a collaborative and problem-solving mindset, a continuous learning attitude, and a drive to grow within a global technology organization.

EDUCATION

Master of Computer Applications (MCA) – Pursuing	2024 – Present (Expected 2026)
KLE Technological University, Hubballi CGPA: 8.03/10 (3rd Semester)	
Bachelor of Science – Computer Science & Mathematics	2021 – 2024
Government First Grade College, Dharwad CGPA: 8.26/10	

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL
OOP & CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms
Web Technologies: HTML5, CSS3, React.js, Redux Toolkit, Node.js, Express.js, Flask
Full Stack (MERN): MongoDB, Express.js, React.js, Node.js
Database & SQL: MySQL, MongoDB
AI / ML Libraries: TensorFlow, Keras, Pandas, NumPy, Scikit-learn, Matplotlib
Dev Tools: Git, GitHub, VS Code
Soft Skills: Team collaboration, adaptability

INTERNSHIPS

Software Development Intern – Full Stack & IoT Armtronix IoT Pvt Ltd	Ongoing
- Developing and maintaining full stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) in a live IoT product environment. - Building and integrating REST APIs for device-to-web communication; applying debugging, testing, and troubleshooting practices to ensure reliable application functionality. - Collaborating with engineering teams in an Agile environment; demonstrating ownership of assigned tasks, proactive communication, and adaptability to new tools and workflows.	
Technologies: MongoDB, Express.js, React.js, Node.js, JavaScript, REST API, Git, Linux	
Full Stack Development Intern Nayoda	1 Month
- Worked on full stack web application development – built and maintained frontend and backend components, integrated REST APIs, and applied clean coding and debugging practices. - Gained practical experience collaborating within a professional software development team; demonstrated reliability, communication, and accountability throughout the internship.	
Technologies: HTML5, CSS3, JavaScript, Node.js, REST API, Git	

ACADEMIC PROJECTS

SkillsSphere – Intelligent Freelance Marketplace Full Stack Project	Mar 2026
- Designed and built a scalable full-stack web application using React.js frontend and Node.js/Express.js backend – applied OOP principles, REST API integration, JWT authentication, and role-based access control. - Implemented real-time features using Socket.IO and integrated Razorpay payment gateway – end-to-end ownership of a complex, multi-module software system. - Wrote clean, maintainable JavaScript code; applied debugging, performance optimization, code reviews, and comprehensive technical documentation throughout the SDLC.	
Technologies: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Socket.IO, REST API, JWT, JavaScript, Git	

SkinInSight – AI-Based Skin Disease Detection System

2026

- Built an end-to-end software system – Python/Flask backend with OOP design, TensorFlow/Keras ML pipeline, and React.js frontend with REST API integration and MySQL database management.
- Implemented role-based access control, session management, and an analytics dashboard with data visualizations; applied SQL queries for structured data retrieval and reporting.
- Practised integration testing, debugging, and performance optimization; documented the full-stack architecture for maintainability and knowledge transfer.

Technologies: Python, Flask, TensorFlow, Keras, React.js, JavaScript, MySQL, MongoDB, REST API, Git

GoParky – Vehicle Parking Management System

2025

- Developed a complete CRUD web application with OOP-structured Python backend, MySQL database design, and JavaScript frontend – applied SDLC practices from design through testing and documentation.

Technologies: HTML5, CSS3, JavaScript, Python, Flask, PHP, MySQL, Git

CERTIFICATIONS & ACHIEVEMENTS

- Infosys Global Hackathon (2025) – Certified for innovation and problem-solving at a national-level competitive hackathon, demonstrating capability aligned with industry engineering culture.
